Your UniCarriers stacker

– because true revolutions start on the floor

Very versatile members of the stacker family are PSP 125 and PSP 160, pedestrian stackers with platform.

The trucks are ideal for medium-height stacking applications in narrow spaces, short, medium and long internal transports, and for occasional order picking, and when equipped with a straddle lift option, double pallet handling. The foldable platform with low step-up height is cast in order to withstand deformations from collisions and has excellent dampers for suspension.

The optional side protection bars unfold quickly and easily for high efficiency. There are several types of fixed platform options and classified overhead guard to improve the efficiency and add to the safety of the operator.

The ergonomic tiller arm with all controls close at hand makes the PSP easy to handle and puts the operator firmly in control. The keypad for individual truck driver settings and bellybutton for operator safety are all combined in the tiller head. Drive speed of up to 8.5 km/h means the truck's performance is at the top of its class.

Easy service access, extended service intervals and all sensors with IP65 or IP67 classification ensure reduced maintenance and improved uptime.

NISSAN
FORKLIFT
**THE BEST
OF 3 ATLET**
TCM

UniCarriers designs, manufactures and supports the most advanced material handling equipment. By integrating the three distinctive brands of Atlet, Nissan Forklift and TCM, UniCarriers is the perfect mixture of Japanese quality and technology, Swedish design and ergonomics and German innovative spirit for the material handling industry. UniCarriers represents more than 65 years of industry experience, an unparalleled global reach and deep understanding of local markets.

ProVision mast design with off-centre lift cylinder for optimised vision over forks.

One-piece machine house cover for easy access and serviceability.

Authorised drivers only with PIN code or Smart Start entry.

Straddle lift to increase ground clearance for handling on ramps.

Battery on rollers.

Equipment bar for accessories.

Foldable or driver-protected platform with excellent damping.

Robust chassis designed to suit your tough environment.

It's all about
the price.
But what
price?

Reduce your Total Cost of Operation with UniCarriers

We agree. Price is everything. Or to be more specific: your Total Cost of Operation (TCO). That's why we're so focused on cutting costs and improving your material handling. The truck and its performance play an important role, but this is even more about how we can support you in optimising your warehouse operations to give you the best value for your money. Which – in the long run – is what creates a winner.
